If you follow carefully these instructions for the assembly and installation process your life will be easier!

A pair of trestles are very useful when assembling the frames.

Some parts may have sharp edges so use gloves and be careful when handling the parts. All Eclisse products are fully inspected and tested before they leave the factory.

The pocket door frame needs to be assembled flat and as a complete unit with bracers in place.

Installing the complete unit into the stud work requires two people.
